Coroutine - Wikipedia

Coroutines are computer-program components that generalize subroutines for non-preemptive multitasking, by allowing multiple entry points for suspending and resuming execution at certain locations.

lua-users wiki: Coroutines Tutorial

What are coroutines? Coroutines allow us to execute several tasks at once. This is done in a controlled manner by passing control to each routine and waiting until the routine says it has finished.

A Curious Course on Coroutines and Concurrency

A Curious Course on Coroutines and Concurrency.

9 Coroutines - The Programming Language Lua

9 Coroutines. A coroutine is similar to a thread (in the sense of multithreading): a line of execution, with its own stack, its own local variables, and its own instruction pointer, but sharing global variables and mostly anything else with other coroutines.

Coroutines with async and await syntax - Python.org

Abstract. The growth of Internet and general connectivity has triggered the proportionate need for responsive and scalable code. This proposal aims to answer that need by making writing explicitly asynchronous, concurrent Python code easier and more Pythonic.

Python: Generators, Coroutines, Native Coroutines and ...

NOTE: This post discusses features which were mostly introduced with Python 3.4. And the native coroutines and async/await syntax came in Python 3.5. So I recommend you to use Python 3.5 to try the codes. Generators
Generators are functions that generates values. A function usually return

asyncio Asynchronous I/O Python 3.7.1 documentation

asyncio is a library to write concurrent code using the async/await syntax. asyncio is used as a foundation for multiple Python asynchronous frameworks that provide high-performance network and web-servers, database connection libraries, distributed task queues, etc.

Using C++ Coroutines to simplify async UWP code | Visual ...

The Universal Windows Platform (UWP) introduced many async APIs; there are now almost 1700 of them. In fact, the team switched every API that could take 50ms or more to complete to async mode.

Lua 5.2 Reference Manual

1 Introduction. Lua is an extension programming language designed to support general procedural programming with data description facilities.

More advanced topics [Psycopg 2.8.dev0 documentation](#)
Adapting new Python types to SQL syntax Any Python class or type can be adapted to an SQL string. Adaptation mechanism is similar to the Object Adaptation proposed in the PEP 246 and is exposed by the `psycopg2.extensions.adapt()` function.

Using Maven - Kotlin Programming Language

[Edit Page Using Maven Plugin and Versions](#). The `kotlin-maven-plugin` compiles Kotlin sources and modules.

Currently only Maven v3 is supported. Define the version of Kotlin you want to use via a `kotlin.version` property:

22. Generators - (Exploring ES6)

22.1.5 Use case: receiving asynchronous data # Generators can receive input from `next()` via `yield`. That means that you can wake up a generator whenever new data arrives asynchronously and to the generator it feels like it receives the data synchronously.

Promises for Game Development - What could possible go wrong?

If you find an issue with this article or have feedback please email ashley@codecapers.com.au or log an issue at the [github page](#). Introduction. In this article we talk about our experience making the promises pattern work for game development.

Tcl/Tk 8.6

Latest Release: Tcl/Tk 8.6.9 (Nov 16, 2018) First released in 2012, Tcl/Tk 8.6.* is the current supported series of releases. [Download Tcl/Tk 8.6.9 Source Releases](#)

Event Loop Python 3.7.1 documentation

The event loop is the core of every asyncio application. Event loops run asynchronous tasks and callbacks, perform network IO operations, and run subprocesses. Application developers should typically use the high-level asyncio functions, such as `asyncio.run()`, and should rarely need to reference the

Unity Free Assets From Unity AssetStore

List of some must have free unity assets in Unity AssetStore, they are very helpful in creating prototype and some of them even can be used in release game

Nuitka Home

Pythran and Nuitka. As suggested by @wuoulf (Wolf Vollprecht) we had a meeting at the side of the PyCon DE 2018 conference in Karlsruhe, abusing the C++ regular table as a forum for that, which was a very nice experience.
