[How to Cut Crown Molding using easy Templates - Sawdust Girl](#)

Cutting crown molding can be frustrating and confusing. Inside and outside corners are cut with different settings. Usually the right side of the cut is the left side of the corner. Sometimes you need to flip the crown upside down to cut. Using templates gives you a visual reference for which piece

NOT MANY CROWN CHARTS CALCULATE miter/bevel angles for corners less than 60 degrees (even the Bosch Angle Finder will not currently calculate miter/bevel angles for corners sharper than 60 degrees).

[How to Install Crown Molding | how-tos | DIY](#)

The hardest part of installing crown molding is cutting the corners. You can't do it like any other trim pieces because the molding sits at an angle between the wall and the ceiling (Image 1). Using a coping saw (Image 2) is the easiest way to cut the corners because a coped joint is tighter than a mitered joint. A coping saw is also good for a beginner. Any gap in a coped cut can be easily

[How To Cut And Install Crown Molding And Trim](#) When cutting your crown molding laying flat, you will

need to know the crown spring angle. The crown spring angle is the angle between the back of the crown and the wall when the bottom of your crown molding is held firmly on the wall.
